

## PRESS RELEASE

# Inc. Magazine Ranks Cymphonix #5 in Top 100 Fastest Growing U.S. Computer & Electronics Companies

Cymphonix Also Ranked 168TH Fastest Growing of 5,000 U.S.-based Businesses

August 21, 2008

Cymphonix, a leading provider of Internet security solutions, announced today Inc. Magazine has ranked it as the fifth fastest growing Computer and Electronics Company in the U.S. — as well as an impressive 168 out of a total 5,000 privately-held U.S.-based companies featured in the Inc. 5000 list. To achieve these rankings, Cymphonix posted a 1,398.7% revenue growth between the years 2004 - 2007.

The Inc. 500 list also ranks Cymphonix as:

- The #1 fastest growing Utah-based Computer & Electronics company; and
- The #5 fastest growing Utah-based company overall.

“It’s exciting that Cymphonix is receiving this recognition from a well-respected publication like Inc. – it’s a testament to the hard work we’ve spent in developing a great product in the Cymphonix Network Composer™,” said Kevin Santiago, founder and CEO of Cymphonix. “Being so highly ranked on the Inc. 500 also demonstrates the momentum Cymphonix is building as we introduce our technology to new customers.”

Network Composer, the flagship product for Cymphonix, utilizes advanced technologies to automate Internet security for organizations of all sizes. Through a Reveal, Optimize and Automate™ approach to Internet security, Network Composer helps companies optimize traffic for critical data and reduce or remove non-critical, or harmful Internet activity.

“One reason Cymphonix is experiencing such explosive growth is that we provide IT administrators the ability to easily see and control both Web-enabled applications and Web sites by prioritizing bandwidth for critical content – and blocking access to detrimental content,” added Santiago. “Cymphonix’s growth is driven by the growth of the Internet. Internet usage has changed from just e-mail, to business applications, video streams, and social networks, all of which leads to the need for more control.”

### About Cymphonix

Cymphonix Corporation, headquartered in Salt Lake City, Utah, uses patent-pending technology to reveal, optimize and automate Internet security. With deep-packet scanning technology, Cymphonix solutions address the issues created by evolving content – including web applications and bandwidth-intensive websites. Cymphonix products seamlessly integrate network protection, application performance, and traffic visibility into a single, easily managed solution. Leading the Cymphonix product line is Network Composer, a smart gateway appliance that helps organizations understand at a glance who is abusing network resources and with what applications – enabling problems to be corrected instantly through a clear, easy-to-manage interface.
